ABSTRACT: We propose a unified theory of all the fields (electro-weak, strong, and gravitational) as $E_8^{(8)}$ principal bundle connection. Three generations and three colors are dualized by octonionic ladder system which culminated in Freudenthal-Tits magic square construction of exceptional Lie algebras. $V-A$ interaction arises naturally from self-dual Ashtekar connection. The Dirac equation and the Palatini action of Loop Quantum Gravity are naturally derived from pure $E_8^{(8)}$ Yang-Mills Lagrangian.

KEYWORDS: triality

Dedicated to the memory of my father.

Contents

1	Introduction	2
2	Octonions	2
3	Furey's ladder system	3
4	Magic square	3
5	$E_8^{(8)}$ Yang-Mills theory — an unification of the standard model and quantum gravity	6
5.1	Elementary Particles	6
5.2	Derivation of the Dirac equation & Loop Quantum Gravity	12
5.2.1	Dirac equation	13
5.2.2	Loop Quantum Gravity	14
A	Self-dual Ashtekar connection	16
B	Arnowitz - Deser - Misner formalism	18
C	Appearance of γ_2	20
C.1	Reconciling to quantization of the Dirac fields	26
